

On Board Data Services ONLINE 24/7

FREE SERVICES FOR CBAA MEMBERS

On-Board Data Services (OBDS), the makers of Aviation Docs™ has been serving the global aviation community for 21 years, and we're like to reward all Canadian business aircraft operators for their amazing safety record, with a gift – to help keep that safety record intact.

OUR WORK WITH CBAA

As an active participant in CBAA's projects to improve air safety in Canada we have worked with CBAA to develop an easy-to-use, state-of-the-art Risk Management System that is free to all CBAA members, which you may access today at <http://nad.obds.com>

When CBAA announced they would like to provide a FRAT report to all pilots in Canada, we worked with them to provide FRAT as a function of the RMS system. but realized that the most pleasurable and convenient way for a pilot to fill out the form would be to pop it into our Aviation Docs system.

Aviation Docs allows pilots to fill access the FRAT form in two finger touches on the iPad and version 3.0 of our app (coming soon) will allow FRAT to be filled without an Internet connection and sent automatically to the NAD database on the next sync.

Our clients who already have subscriptions to our service can do this easily, but we wanted this service to be available to all CBAA members, to improve aviation safety Canada-wide in one move.

So, here's our plan....

On Board Data Services ONLINE 24/7

FOR ALL MEMBERS: FREE ACCESS TO CBAA DOCS, FRAT AND NAD

First, we will provide all CBAA members free and automatically updated access to all CBAA documents, CBAA news items, FRAT report forms and the NAD RMS at no cost, both online and via our Aviation Docs iPad and Windows client via a special virtual “CBAA fleet” that allows all documents to be viewable offline.

For access via Aviation Docs, operators will need to sign our standard licensing agreement (as it covers our cybersecurity, privacy and liability agreements), but the service will be made freely available to all your pilots in all of your aircraft.

Go here to sign up: <http://www.obds.aero/cbaa>

EXISTING AVIATION DOCS USERS: SUBSCRIPTIONS TO CBAA DOCS, FRAT AND NAD

In addition, all current Canadian clients of Aviation Docs who are CBAA members can have all the same CBAA publications subscribed and automatically updated on all Aviation Docs accounts, at no cost PLUS FRAT reporting.

The screenshot displays the Flight Risk Assessment Tool (FRAT) interface on an iPad. At the top, the CBAACAA logo is visible with the tagline "Canada's Voice For Business Aviation". Below the logo, the title "Flight Risk Assessment Tool" is centered. A "Reset form data" button is located in the top right corner. The form is divided into two main sections: "Email addresses" and "Flight Information". The "Email addresses" section includes a text input field and a "Send" button, with a note stating: "Please enter your email address into the pilot email field and we will send you the information you enter into this form in PDF format when you press the Send button. Note: Your fleet manager's email is automatically loaded from the account login." The "Flight Information" section contains several text input fields for: "Fleet Manager", "Pilot", "DATE", "TRIP", "TAIL", "AIRCRAFT TYPE", "DEPARTURE", "DESTINATION", and "PIC". The iPad's status bar at the top shows "2:46 PM" and "100%" battery.

TRIAL USERS: FREE 6 MONTH FULL SERVICE TO AVIATION DOCS

For fleet operators who would like the “full experience” of Aviation Docs we will offer your entire fleet a six-month free trial that will allow you to send all your corporate documentation, manuals, regulations, etc.... via our system, make use of our extensive smart form library, our free smart form development service, tech pubs library, digital rights protection, free training, and world-class technical support.

We’d be happy to set this up for your operation, anytime, simply call 450-476-1420 or email support@obds.com and we’ll set it up, train your staff and you’re off.

If after 6-month trial, should your operation wish to continue (which we think you might) we’ll provide you with a subscription agreement, but should you decide not to participate after 6 months, you’re still free to use the CBAA fleet at no cost, you’d just need to remove your own documents.

We invite you to contact us, visit us, and ask any questions you might have.

You should know that OBDS maintains its data centers in Canada, we have very sophisticated cybersecurity that includes a SEIM system, disaster recovery, intrusion detection, malware prevention systems, DDOS prevention systems, 24-hour system monitoring, and a staff trained in dealing with any eventuality.

OBDS is in the process of obtaining AS9115A certification. We are NST.SP.800-53 Rev4 compliant, PCI DSS compliant, GDPR and PIPEDA compliant and our data center provider is SOC-2 compliant.

A new iPhone-compatible version will be released Q2 2018!
