WEDNESDAY, JUNE 13TH EDUCATIONAL SESSIONS

Get ready for the future as CBAA 2018 draws on subject matter experts to work with delegates to identify challenges and map out solutions to the issues facing you today – and tomorrow

NEW TIME

Keynote Presentation:

Business aviation forecast and trends

Are things finally looking up for business aviation? There is a growing sense that these interesting times are changing. Find out what is in store for both the Canadian and international markets from one of aviation's leading analysts, **Rolland (Rollie) Vincent**, President, Rolland Vincent Associates, LLC and JETNET iQ Creator/Director.

NEW SESSION

Emergency Communications after a Business Aviation Accident

Business aviation operators have unique emergency communications requirements. Donald will provide a high-level overview of Fireside's one-of-a-kind extensive workshop, covering practical solutions, peer networking opportunities, and more.

Speaker

- **Donald J. Chupp** President & CEO, Fireside Partners Inc.

FEATURED PLENARY SESSION

Recent Accidents and Their Impact on Business Aviation: The TSB Answers Your Questions

TSB Chair Kathy Fox will examine several recent accidents and discuss their impact on business aviation. Ms Fox will look at what companies need to know, and ways that safety can be improved...

Speaker

- **Kathy Fox**, Chair of the Transportation Safety Board of Canada

UPDATED SESSIONS

Behaviour and Etiquette in a post #MeToo World

This session will focus on the impact of Bill C-65 regarding harassment, sexual harassment and violence on federally-regulated employers and help employers and employees develop a better understanding of workplace behaviours that are or are not appropriate in a post #MeToo world..

Speaker

- ***Diane Aubé Lazenby, L.L.L., L.L.B, Legal Counsel and Workplace Investigator, DAL Law***

CRM 2019: Be Prepared!

A brief glimpse into the new requirements for the CRM training to comply with the Advisory Circular that will come into effect January 2019. Come participate in an actual Pilot/Flight Attendant Drills session.

Speaker

- ***Michele Mentink, CEO, Sterling/ICFS Group***

Marijuana + Aviation = What Could Possible go Wrong?

The legalization of marijuana in Canada complicates the fitness to fly debate. Legalization is months away, and the regulator has yet to provide industry with clear guidance. Uncertainty undermines safety. Steve will guide participants through proactive steps they should take now to address this pressing issue.

Speaker

- ***Steven P. Williams, Partner, Emond Harden, Labour and Employment Law***

REGISTER HERE

Dealing with Labour Shortages

Join a panel of leading experts as we develop tools and strategies to find and keep qualified pilots and staff. Topics will include:

- What is really happening in the aviation labour market and in BA specifically?
- What are the greatest challenges and how do we overcome them?
- What we can learn from our colleagues and their best practices?
- How can BA raise its profile in the educational community?

Speakers

- **Rob Donald, Executive Director Canadian Council For Aviation and Aerospace**
- **Dr. Suzanne Kearns, Associate Professor, Geography & Aviation**
- **Dr. Chris Broyhill, Vice President - Consulting at MENTE Group LLC**
- **Andrew Money, Chief Pilot, Chartright**

Resilience through SMS

This session will demonstrate how to protect people, property and the environment during simultaneous crisis events. Gino will walk you through transparent crisis management progression and guide you through a response that aligns with your organizational values and principles

Speaker: *Gino Matteoni, Director Health, Safety, Signature Fight Support*

Fatigue Risk Management Approaches for Business Aviation

This session will present approaches to mitigate fatigue to reduce operational fatigue risk and to comply with IS-BAO standards. Case studies of operators that have implemented Fatigue Risk Management approaches will demonstrate what can be achieved in terms of reductions in fatigue and fatigue-related incidents.

Speaker

- **Dr. Daniel Mollicone, CEO, Pulsar Informatics**

Loss of Control - Inflight (LOC-I) Solved: The Global Standard

Corporate and business aviation enjoy an excellent safety record, largely due to the implementation of Safety Management Systems which help operators proactively identify and manage risks. Find out how to address Loss of Control In-flight (LOC-I), the number one cause of fatal accidents in corporate aviation from one of the industry's leading experts in this field.

Speaker

- **Paul "BJ" Ransbury, president & CEO, APS Aviation Performance Solutions**

Countdown to CORSIA

Carbon offsets and reductions schemes – whether international, through ICAO or domestic regulations created by Transport Canada – are coming. Find out if -- and how – your operations will be affected; and what your next steps are.

Speakers

- **Bruce Parry, Senior Environment Manager, European Business Aviation Association**
- **Gilles Bourgeois, Chief, Environmental Protection and Standards, Transport Canada**

UAVs in Canada: An Update

The presentation will provide an update on current regulatory efforts, and what is being planned. An overview of the rapid growth of the Canadian UAS industry will conclude with some thoughts about what might happen next as well as an examination of a new UAV Risk Assessment Tool

Speakers

- **Mark Aruja, Chair, Unmanned Systems Canada**
- **Gasper A. Correia, President, Flight Insight**

ADS B Lite & Late

If you think the upcoming ADS-B Out V2 mandates won't affect you, or that you have time to prepare, you could be mistaken. Join one of Canada's top avionics MROs for an informed discussion on everything you need to know to be ready for ADS-B including mandate(s), timing, applicability, impact of non-compliance, common questions, hurdles to implementation. choices in implementing ADS B equipage and more.

Speaker:

- **Dave Hume, Manager, Sales & Marketing, Mid Canada Mod Center**

PLUS! MONDAY & TUESDAY CERTIFIED PROFESSIONAL DEVELOPMENT COURSES

Taking place just prior to CBAA 2018 – Monday and Tuesday June 11 & 12, these courses offer member

delegates an opportunity to update their skills and enhance their careers with a CBAA-endorsed professional development programming presented by the Canadian Council for Aviation and Aerospace.

Quality Systems Auditor for 604 Operators

Mon., June 11th & Tues., June 12th

This **two-day workshop** provides an in-depth focus on 604 operators and how to audit their Quality Assurance Program (604.204 CARs) and Safety Management System (604.207 CARs). It is a learning opportunity for aviation operational personnel with little or no auditing experience, as well as experienced aviation operational personnel who wish to become internal operational auditors.

Quality Assurance Manager

Monday, June 11th

This **one-day workshop** was developed to prepare participants for Transport Canada expectations in accordance with established Occupational Standards. It provides a comprehensive overview of the role and responsibilities of the Quality Assurance Manager. Upon completion of this course, participants will have a sound understanding of the fundamentals of the quality processes and procedures, and key responsibilities of a Quality Assurance Manager.

Corrective Action Plans

Tuesday, June 12th

This workshop enables participants to develop meaningful and appropriate corrective action plans. Upon the successful completion of this workshop, participants will possess a thorough understanding of how to interpret findings, develop corrective actions, determine root causes and develop preventative actions.
